
Presentations That Sticks the Societies

Society web management system

A guide by Shivam Yadav

Society web management system

Problem faced in societies

- 1. No platform with security for communication.**
- 2. Not possible to physically attend all meeting for all @ sametime.**
- 3. NO platform for registering complaint and invitations.**
- 4. NO track of events, meetings, expenditures and maintenance which leads to conflicts.**
- 5. No proper information of neighbours.(wheather owner is living or tenant.)**

Society web management system

Solutions we provide

- 1. private platform with security for communication.**
- 2. Updates related to all meeting with option of suggestion.**
- 3. Online registering complaint and invitations and can track the complaint with history.**
- 4. Online track of events, meetings, expenditures and maintenance.**
- 5. Know your society with basic information of neighbours.(wheather owner is living or tenant.)**

Society web management system

The different types of modules present in this project are

- 1. Super Admin**
